

"The performance is noticeable from setting-off, making acceleration much more responsive."

THE TUNIT ENHANCED JAGUAR ECURIE ECOSSE

for Ecurie Ecosse: a sizeable gain over the standard 207 bhp, 320 lbs/ft torque, and also a good gain over the mapped option offering 235 bhp.

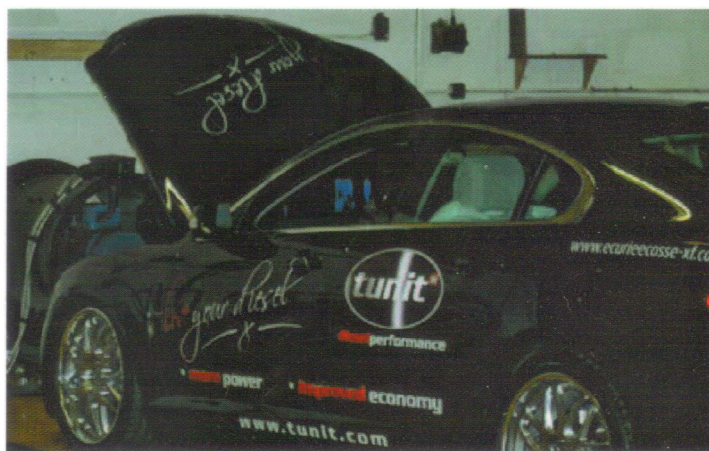

As with all Tunit packages, a fuel economy improvement of 7-10% can be expected in most cases, helping us all in this harsh climate of rising fuel prices.

The performance is noticeable from setting-off, making acceleration much more responsive. This power is felt all the way through an impressive mid range, giving a quicker and smoother gear change.

The Tunit device is available for all diesel vehicles. For the full range visit www.tunit.com.

Having being given the task of upgrading the Jaguar and offering a higher grade of tuning than a Re-Map, Tunit was happy to take its standard Tunit package and modify it to the special requirements demanded by the new prestige brand.

After much time spent carefully programming and testing - being conscious not to effect stringent emission levels - Tunit managed to deliver a 260 bhp, 350 lbs/ft version

Tunit is among the foremost of Britain's diesel electronic tuning specialists. Full details of the Tunit range are at www.tunit.com, or you can call and speak to one of Tunit's specialist technical advisers on 01257 274100.
